## ATTIC INLETS

Our line of Sturdy Seal® Attic Inlets gives growers the ease and flexibility needed to control temperature and humidity within their houses. With its low profile design and insulated door, the Sturdy Seal® Attic Inlet reduces heat loss and air leakage. When fully open (top right image), warm air enters the house a full 360° and the low profile of the inlet allows it to attach to the ceiling faster. This allows for better air mixing and helps heat the house and keep the floor drier.

- Revolutionary 360° air dispersion
- Can be configured to operate on either an actuator or static pressure
- Increases:
  - o Fuel savings
  - o Air movement
  - o Air quality
- Leak resistant design
- Non-rusting components
- Available in 2 configurations
  - o Ai-24 HD attic inlets for operation exclusively on the actuator
  - o AI-24 for operation exclusively on static pressure
