Integrated Felt and Latch

## Fast Track Ceiling Vent

Our Fast Track Ceiling Vent (U.S. Patent No. 11,333,392) takes the concept of a ceiling vent to the next level. It comes fully assembled right out of the box, goes up very quickly, and is very competitively priced.

- Available with an aluminum or UV Stabilized PVC frame
- More ventilation due to curvature directing air to the ceiling instead of to the ground
- 6", 8", 10", 12", 14" heights with custom lengths available
- Integrated track cord tensioner/locator
- Integrated winter latching system
- Cord guide included along with jig to speed up installation
- Superior performance
- Perfect for retrofit applications--the ceiling vent is surface mounted to compensate for framing irregularities and can be ordered to fit virtually any opening
- Orders come bulk-packed in palletized gaylords to make it easier and faster on installation crews
